

# Capability Statement

## Core Competencies

Meadows Auto Supply was founded in 1976 by David P Meadows, President. The company currently is the only small, independent wholesaler of automotive equipment in central Texas. David P Meadows started the company with a dream and a passionate enthusiasm for automobiles. Upon completion of nine (9) years of service with the United States Army, David P Meadows believed he could apply his intense work ethic to the automotive industry. He accomplished that and more. Meadows has positioned his company as an independent wholesaler, allowing companies to seek their product requirements from a personable but dependable source instead of the large chain retailers. The values maintained within the company are reliability, honesty, integrity, knowledge and exceptional work values.

The management team at Meadows Auto Supply incorporates over fifty (50) years of automotive experience, automotive product knowledge and expert consultations. In addition to technical expertise, the team has a combined seventy (70) years of combined sales experience. Our success stems from our automotive passion and our drive to earn and retain customers and encourage lasting business relations. Meadows Auto Supply provides each client with a vast product selection and always that supportive and creative advice to meet their individual and often customized specifications.
